

# BIM-EPIC™

## ***News: CSI International Announces Support for OPTICA™ zVT Virtual Tape Library on BIM-EPIC***

**CSI International is proud to announce a partnership with Optica Technologies to provide direct support for the OPTICA zVT family of mainframe virtual tape products on BIM-EPIC Tape and Disk Manager.**

BIM-EPIC is a premier automated tape- and disk-management system that dramatically improves the performance of z/VSE data centers. Enterprise data centers around the world have come to rely on BIM-EPIC's state-of-the-art storage-management features. Now, paired with Optica's zVT advanced virtual tape library system, BIM-EPIC and OPTICA provide an industry-leading, fully integrated solution that allows z/VSE users to seamlessly operate and manage their virtual tape environments. To view the BIM-EPIC data sheet, click [here](#), and to find more information on zVT, click [here](#).

Optica's next-generation zVT family of mainframe virtual tape products delivers new levels of modularity, scalability and performance. When combined with Optica's world-class service and support and satisfaction guarantee, the zVT 5000-iNAS, zVT 3000i and zVT 5000-FLEX offer the enterprise-class features required to serve the broadest set of mainframe customers and workloads in the industry.

To learn more about the features and benefits of Optica's zVT solutions, you can view a one-hour webinar [here](#).

**Are you still evaluating whether to migrate to a virtual tape system from physical tape, or to replace an aging, EOS virtual tape system?**

Upgrade your tape environment *now* to use one of Optica's zVT products with BIM-EPIC. The zVT solution offers

- Seamless operation and tape management
- Superior reliability and security
- Outstanding performance, resiliency and scalability to serve a broad set of z/VSE users
- Consultative data migration services

**Please contact your [CSI account manager](#) for information so we can design a zVT solution that meets your needs!**
